

ISO27035 Lead Security Incident Manager

Why should you attend?

In this five-day intensive course participants develop the competence to master a model for implementing an incident management process throughout their organization using the ISO 27035 standard as a reference framework. Based on practical exercises, participants acquire the necessary knowledge and skills to manage information security incidents in time by being familiar with their life cycle. During this training, we will present the ISO 27035 information security incident management standard, a process model for designing and developing an organizational incident management process, and how companies may use the standard. This training is also fully compatible with ISO 27035 which supports ISO 27001 by providing guidance for incident management. For more information visit www.bcaa.uk
